One of the things I really like about Why Summits is how intimate the conference is. You know there are a lots of other places that you can go to do talk about project management and portfolio management which I really love, you know a large global meetings like DIA, NF BIO, but there's nothing like the intimacy that Why Summits provides to us and being able to network with the small group of people. So that's one of the many reasons why I choose Why Summits

In today's fast-paced business world, negotiation is a critical skill that managers must possess. However, despite spending 62% of their time in negotiation-like activities, only 4% of managers receive adequate training in this area. To add to this, outdated approaches to negotiation continue to be taught, while recent scientific findings on effective negotiation techniques often go unnoticed. At this upcoming conference, we are fortunate to have Dr. Stephane Royer as a speaker who will share four valuable secrets that he has validated through his Ph.D. research and extensive experience. These secrets are specifically tailored to enhance your negotiation skills and bring value to your day-to-day activities. Dr. Royer's presentation is a must-attend for managers seeking to improve their negotiation skills and stay up to date with the latest science-backed techniques. Don't miss out on this opportunity to learn from an expert and gain a competitive edge in your business dealings.

EQUITY, DIVERSITY & INCLUSION

2:00pm **KEYNOTE FOLLOWED BY A PANEL DISCUSSION: EQUITY, DIVERSITY & INCLUSION IN PHARMA/BIOTECH: FROM COMMITMENT TO ACTION**

Description:

Robust equity, diversity and inclusion (EDI) practices play a pivotal role in shaping a positive work culture and driving success.

While equality treats everyone the same, equity recognises that unique circumstances require tailored treatment and this fairness promotes trust. Diverse teams in terms of race, gender, age, abilities, and more, are likely to be far more creative and innovative. Inclusive organisations who empower employees to contribute fully, boost morale and productivity. This is true for all organisations.

However, EDI initiatives are particularly crucial in the pharma/biotech industry. How research is prioritised, designed and conducted can impact who it can benefit. Ensuring diversity in clinical trials and research helps to produce more comprehensive and accurate data that reflects the needs of diverse patient populations. Karen will share examples of how LifeArc is putting their EDI commitments into action, working to reduce health inequalities, driving quality in science and research through open and diverse collaboration, and addressing the unique needs of different communities.
